

Eric Carle Artwork

Eric Carle is famous for books such as *The Very Hungry Caterpillar* and has an individual and fun way of working! He uses paint to create different textures and colours, then cuts and collages these to create fantastic pictures!

We had a go at making pictures like this - first we painted A5 paper using thick paint or wax crayons and watercolours. Next we drew pictures of our animals and cut pieces of our decorated paper to fit the shapes, we added detail using smaller pieces. We saved our spare papers with our art - bits for other creations!
